Xavier — Complete SMM training pack (print edition)

This single document bundles the **mission**, the **operator handbook**, and **key training materials** for Xavier. It is generated from repo sources; regenerate with `scripts/build_xavier_handbook_bundle.py`.

Mission — America First Kentucky

America First Kentucky is sovereign constitutional intelligence built to support Rep. Thomas Massie and independent leaders who put principle over power. We provide strategic clarity, rapid principled messaging, and long-term vision for constitutional leadership. Our mission is simple: end blank-check wars and restore war powers to Congress, eliminate insider corruption and congressional self-dealing, and dismantle the cartel economy crushing working families while securing the border and defending civil liberties. We do not replace human leadership; we strengthen it with wisdom, speed, and integrity. This is independent leadership for the digital age.

Handbook — operator summary (Xavier)

Source file: `docs/skill-work/work-politics/smm-xavier-handbook.md`

Role: Social media manager for **@usa_first_ky** (America First Kentucky — unofficial analysis & message support). **You publish;** the agent drafts. **You are not** Rep. Massie, not his official campaign, and not his congressional office.

This document is your **single onboarding spine**. Deep training lives in linked files.

---

1. Start here (first 48 hours)

Step	Doc / action
1	Read this handbook top to bottom once.
2	smm-onboarding-packet.md → smm-day1-checklist.md
3	smm-onboarding-curriculum.md — modules M0–M5
4	smm-training.md — **from the top** (US civics, who Massie & Khanna are, then voice + tactics)
5	account-x.md — account rules and workflow
6	content-queue.md — track idea → draft → review → posted

Access: smm-access-checklist.md (companion verifies before Day 1).

---

2. What you are selling (business context — so you understand the "why")

The companion operates **work-politics**: bounded, human-approved campaign support (briefs, research, message discipline, X drafts). The **@usa_first_ky** account is a **live demo** of that workflow — disciplined analysis and draft copy, with **you** as the human gate for what actually hits X.

Implications for you:

- Quality and credibility on the account **support future clients** (other campaigns, operators). Sloppy or off-brand posts hurt the **product story**, not just one race.
- You are not responsible for **sales** or **FEC compliance** on behalf of a client campaign; your lane is **execution + voice QA** on this account per account-x.md.

Canonical commercial offers (for awareness when talking to the companion): offers.md. Your day job remains **@usa_first_ky** unless the companion assigns something else.

---

3. The principal and the second lane (no US politics background required)

Person	Role	Your focus
Thomas Massie	U.S. Representative, **KY-4** (Kentucky). Republican, libertarian-leaning, engineer/farmer. **Primary client** for @usa_first_ky.	Daily: voice match, amplify his line, defend with **receipts** (votes, links).
Ro Khanna	U.S. Representative, **CA-17** (Silicon Valley). Democrat. Appears in training because he and Massie sometimes **co-sponsor** the same bills (e.g. war powers) — **bipartisan on those issues only**.	**Training / demo context.** You do **not** run Khanna's social unless the companion explicitly assigns a demo task.

Plain-language civics + bios: smm-training.md (sections before “Massie’s authentic X voice”), principal-profile.md, khanna-principal-profile.md.

---

4. Non-negotiables (legal / ethical posture)

Do	Don’t
Post only **reviewed** content you stand behind.	Autonomous posting by bots or scheduled dumps without your pass.
Tie factual claims to **sources** (news, Congress.gov, Massie’s own posts).	Invent positions Massie didn’t take.
Label analysis as **unofficial** when context needs it.	Speak as Massie, his campaign manager, or his office.
Escalate if a draft feels legally or reputationally hot.	Promise votes, endorsements, or deals on his behalf.

FEC / campaign law: Handled by any **official** campaign counsel; this account is **not** that. If unsure, **don’t post** — ask the companion.

---

5. Compensation & duration (reference)

Formal terms: smm-job-description.md — base **0.1 BTC** through KY-4 primary (May 19, 2026); **0.1 BTC bonus** if Massie wins the primary; reporting to the companion.

---

6. Daily operating rhythm (what “good mornings” mean for you)

The operator may run an internal **daily brief** script and a **Massie news scan** (draft post ideas). You don’t run those scripts unless the companion asks you to use Cursor — but you **consume** the outputs:

Input	What you do
Daily brief file (if shared)	Scan for priorities, risks, and what Massie did/said.
Draft post candidates (from agent)	Run through smm-training checklist; edit; post or reject.
Internal WAP dashboard (`/wap` on miniapp host, token from operator)	Optional: log jobs and **paste** Cursor outputs so work isn’t lost when a chat thread closes. See wap-dashboard.md.

Daily vs weekly brief (one sentence): Daily = fast pulse + snapshot for the operator. **Weekly** = deeper, cited “week of” story for review. You live mostly in **daily** rhythm + your posting queue.

Extended cadence templates: externals/massie/smm-training/daily-operating-rhythm.md, week-1 ramp.

---

7. Tools you’ll touch

Tool	Purpose
X (@usa_first_ky)	Publish, reply, quote-tweet.
content-queue.md	Truth for what stage each content idea is in.
Agent / Cursor skills (operator-run)	Drafts and news scans — you **review**, you **post**. Skill example: `.cursor/skills/massie-x-news-search-draft/SKILL.md`.
WAP dashboard	Optional job log + paste area for agent output.

---

8. Escalation

Situation	Action
Draft wrong on facts	Don’t post; flag companion; request corrected draft with sources.
Harassment, legal threat, or media inquiry	Don’t engage beyond minimal factual correction if companion approves; **escalate immediately**.
Voice drift	Re-read smm-training.md; pause quote-tweets until recalibrated.
Burnout or scope creep	Tell the companion; scope is **through primary** unless extended in writing.

Companion contact: *(companion fills in: Telegram, email, etc.)*

---

9. One-page “week 1” success

By end of Week 1 you should be able to:

1. Post **without** sounding like the official campaign.
2. Explain **Massie vs Khanna** in two sentences each.
3. Run any agent draft through the **checklist** in smm-training.
4. Keep **content-queue** accurate for what you shipped.

---

10. Index of all SMM-facing docs

Doc	Use
smm-workspace.md	One-link list of links
smm-onboarding-curriculum.md	Modules + assessments
smm-training.md	Civics, principals, voice, allies/adversaries, checklist
opposition-brief.md	Gallrein, Trump/MAGA
clients/massie-issue-asymmetry.md	Wedge ideas (with companion)
iran-foreign-policy-brief.md	Iran / war powers depth
calendar-2026.md	Dates

Human-always-approves public ship. This handbook is operator-side WORK; update as the race and scope change.

SMM training — civics, voice, allies/adversaries, checklist

Source file: `docs/skill-work/work-politics/smm-training.md`

Audience: Xavier (SMM). Reference for voice calibration, authenticity checks, and draft refinement.

Do not assume US politics: If any term below is new, read this section before the voice section. Full bios and updates: principal-profile.md (Massie), khanna-principal-profile.md (Khanna).

US politics — minimum viable context (no prior knowledge assumed)

What “Congress” is (federal)

The **United States Congress** is the national legislature. It has two chambers:

Chamber	What it is	Rough size
House of Representatives	Elected from **local districts** (one member per district). Terms are **two years**.	435 voting members
Senate	Two senators per **state** (not district-based the same way). Terms are **six years**.	100 members

Thomas Massie and **Ro Khanna** are both members of the **House** — they are **U.S. Representatives**, not senators.

President vs Congress (why “war powers” comes up)

The **President** runs the executive branch and is **commander-in-chief** of the military. **Congress** is supposed to **declare war** and **authorize** major uses of force. When people argue about **war powers**, they are arguing about **whether Congress must vote** before or while the US uses military force — not about liking or disliking troops.

Elections you will hear about

Term	Meaning
Primary	Party voters choose who runs under that party’s label in the general election. Massie’s **2026 Republican primary** (KY-4) is a major storyline.
General election	The final contest (e.g. November in federal election years) between nominees (and sometimes independents).

Term	Meaning
Incumbent	The person already in the office running again.

“Republican” vs “Democrat” (simple)

- **Republican (“R”)** and **Democrat (“D”)** are the two major parties. They disagree on a lot.
- **They can still work together on specific bills** (e.g. war-powers resolutions). Cross-party sponsorship does **not** mean Massie “became a Democrat” or Khanna “became a Republican.”

Who is **Thomas Massie**? (primary focus for @usa_first_ky)

Fact	Detail
Who	U.S. Representative for **Kentucky’s 4th Congressional District (KY-4)** — northern Kentucky / Cincinnati metro / river counties; mix of urban, suburban, and rural.
Party	**Republican**, often described as **libertarian-leaning** (limited government, civil liberties, skepticism of foreign wars and waste).
Background	MIT-trained **engineer**; inventor/entrepreneur; **cattle farmer** in Kentucky; former local judge-executive.
What the account does	@usa_first_ky is **unofficial** message support — you amplify **documented** positions and record; you do **not** speak as Massie or his official campaign.
2026 race (high level)	He faces a **Republican primary** challenge; **Donald Trump** has endorsed his opponent and attacked Massie. That feud is central to **narrative and risk** — handle with **principle + receipts**, not random partisan insults.

Canonical detail: principal-profile.md.

Who is **Ro Khanna**? (second lane — demo / training only)

You need to know Khanna because (1) **work-politics** uses a **two-party demo** (Massie + Khanna) to show the same *workflow* applies across ideologies, and (2) he and Massie have **real legislative overlap** on some issues (notably **war powers**).

Fact	Detail
Who	U.S. Representative for **California’s 17th District (CA-17)** — **Silicon Valley** (South Bay / East Bay tech corridor).
Party	**Democrat**, progressive / **worker-first** framing in a **wealthy tech district**.
Background	Lawyer; former Commerce official; taught economics at Stanford.
Overlap with Massie	Co-sponsor / partner on **war powers** and **Epstein-related transparency** efforts in the documented record — **bipartisan on those issues**, not on everything else.
2026	He has a **Democratic primary** challenge partly fueled by **wealth-tax** and **tech-donor** tensions.

Unless the companion assigns Khanna-specific posting, your **day-to-day X work** for this engagement is still **Massie / KY-4 / @usa_first_ky**. Khanna appears in **briefs, demos, and training** so you don’t confuse “we mention Khanna” with “we run his social account.”

Canonical detail: khanna-principal-profile.md.

Massie's authentic X voice (verified via @RepThomasMassie)

Source: Thread Reader App archive, verbatim tweet quotes from news (2026-03). Handle: @RepThomasMassie.

Format

Element	Pattern
Threads	Uses 🧵 ; often 4–15 tweets. Default format for complex topics.
Singles	1–2 declarative sentences. Punchy.
Structure	Numbered points (1), 2), 3)); "Claim:" / "Verdict:" when fact-checking; links and docs.

Tone and style

- **Direct, declarative** — States principle, then consequence.
- **First-person "I"** — "I voted," "I received," "I offered," "I remember."
- **Wry but serious** — "Bombing a country on the other side of the globe won't make the Epstein files go away, any more than the Dow going above 50,000 will."
- **Reframes opponent's vocabulary** — "This isn't America First"; "won't Make America Great Again; it will bankrupt us."
- **Professional, evidence-based** — "Let's set the record straight"; "This is significant because…"

Typical sentence patterns

- Principle + consequence: "X won't Y." "This is not Z."
- Constitutional/process: "Congress must vote." "Acts of war unauthorised by Congress."
- Does **not** use "Mr. President" in tweets.
- Does **not** do overt advice-giving ("here's how you could do better") — more "this is wrong" or "this isn't X."

Verbatim examples (from news and archive)

Quote	Context
"PSA: Bombing a country on the other side of the globe won't make the Epstein files go away, any more than the Dow going above 50,000 will."	Iran strikes, Epstein distraction
"I am opposed to this War. This is not 'America First.'"	Iran war-powers
"Congress must vote on war according to our Constitution."	Same
"Acts of war unauthorised by Congress."	Iran strikes
"This isn't 🇺🇸 first. I voted against this, because it won't Make America Great Again; it will bankrupt us."	Foreign aid in DOD approps

---

Calibration exercise: narrative–action alignment

Frame: Narrative and action need to align. When they don't, you can't offramp — you can't credibly de-escalate, pivot, or negotiate. Trump is cited as misaligned; thus failure to offramp.

Goal: Advise Trump (conciliatory tone) with persuasive talking points. Use Massie's voice.

Original drafts (did not match voice)

- Used "Mr. President" — Massie doesn't.
- Overt advice-giving — Massie states principle, lets implication land.
- Too conciliatory — Massie is declarative, principle-first.

Revised options (voice-aligned)

Option	Draft
A	You can't offramp when your narrative and your actions don't match. Americans want coherence. Give them one clear story and one clear path—then the exit opens.
B	"America First" means your words and your actions have to line up. When they don't, you can't credibly de-escalate. Align them, and the offramp is there.
C	You can't pivot when your story and your moves contradict each other. Coherence isn't weakness. It's the only way to offramp.

Lesson: Match his declarative, principle + consequence structure. Avoid overt advice; state the principle and let the implication land. Use his vocabulary (America First) when reframing.

Ally, supporter, adversary research

Purpose: Know who to amplify, who to persuade, who to counter. Shape tactics and strategies accordingly.

Source docs: principal-profile.md, opposition-brief.md. Request "update opposition brief" when new intel (spending, endorsements, narrative) surfaces.

Allies (amplify, coordinate, elevate)

Entity	Relationship	X tactics
Ro Khanna (D-CA)	Co-sponsor war-powers resolution; Epstein Files Transparency Act; "populist horseshoe" — anti-war, anti-endless intervention. Cross-aisle partner.	Quote his posts when aligned; amplify war-powers / Epstein messaging; tag @RoKhanna on shared priorities. Don't over-Democrat; keep Massie's R identity clear.
Warren Davidson (R-OH)	Only other Republican to vote yes on Iran war-powers (Mar 2026); independent-minded.	Amplify; "two Republicans" framing when useful.
Rand Paul (R-KY)	KY Senator; libertarian; endorsed Massie 2026.	Elevate his support; coordinate on KY-specific messaging.
Jim Jordan, Matt Gaetz, Lauren Boebert, MTG	Endorsed Massie 2026; fiscal/constitutional alignment.	Amplify endorsements; use when countering "Massie is anti-Republican" narrative. Caution: some are polarizing; pick moments.
Club for Growth, FreedomWorks, National Taxpayers Union	Highest conservative ratings; libertarian-leaning.	Reference ratings when rebutting "RINO" or "weak" attacks.
Responsible Statecraft, anti-war right	Media/org allies on war powers.	Share their reporting; cite when fact-checking.

Supporters (energize, mobilize, persuade)

Segment	Profile	X tactics
Libertarian Republicans	Constitutional restraint, limited gov, anti-endless war.	Principle-first messaging; "Congress must decide war"; "I vote against omnibus every time."
Anti-war right	War powers, no more Middle East quagmires.	Iran/Iraq/Afghanistan cost ($8T); "radicalize new generations of terrorists"; constitutional angle.
Transparency / Epstein advocates	Want files out; skeptical of cover-up.	"Bombing Iran won't make Epstein files go away"; discharge petition; DOJ releases.
KY-4 constituents	District-specific; local issues, agriculture, Appalachia.	Cattle farm, Vanceburg, Lewis County; district events; local media.
Fiscal conservatives	Against omnibus, deficit spending.	Foreign aid in DOD appropriations; "won't Make America Great Again; it will bankrupt us."

Adversaries (counter, reframe, don't escalate)

Entity	Profile	Opposition narrative	Counter-tactics
Ed Gallrein	Primary opponent. Shelby County; 30+ yrs Navy SEAL; family farmer. Raised ~$1.2M; lost state Senate 2024 by ~1%. Trump-endorsed.	"Trump's guy"; veteran; farmer.	Don't attack personally. Contrast record: Massie's 12+ years, votes, amendments. "Principle over endorsement." Don't mention Gallrein by name in every post; elevate Massie instead.
Donald Trump	Endorsed Gallrein; attacked Massie ("moron," "lightweight," "loser"); campaigned in district.	"Massie is anti-Trump"; "disloyal."	Reframe: "Principle over party"; "Congress must decide war"; "America First means X" (reclaim the term). Don't attack Trump personally; state principle. Conciliatory when possible (narrative-action alignment).
MAGA apparatus	~$5M outside spend (incl. Trump super PAC ~$1.8M on anti-Massie ads).	"RINO"; "weak"; "anti-Trump."	Fact-check; cite endorsements (Paul, Jordan, Gaetz, Boebert, MTG). "Massie has most conservative rating." Evidence over emotion.
Andy Barr (R-KY-6)	Endorsed Gallrein over Massie.	Establishes GOP vs Massie frame.	Note sparingly; contrast with Rand Paul's endorsement. Don't make it a feud.

Tactics and strategies

Strategy 1: Elevate, don't attack

Principle: The best counter to adversaries is a stronger principal. Post about Massie's record, votes, principles, and allies more than you post about opponents.

Tactics:
- Lead with Massie's floor speeches, amendments, committee work.
- Quote allies (Khanna, Davidson, Paul) when they reinforce the message.
- Use "two Republicans voted yes" (Massie + Davidson) to normalize principle over party.

Strategy 2: Reframe the vocabulary

Principle: Don't cede "America First," "MAGA," or "conservative" to the opposition. Reclaim them on Massie's terms.

Tactics:
- "This is not America First" (re: war without vote).
- "Won't Make America Great Again; it will bankrupt us" (re: foreign aid).
- "Congress must decide war" — constitutional, not partisan.

Strategy 3: Evidence over emotion

Principle: Massie's voice is analytical. Attacks on him often rely on labels. Counter with facts.

Tactics:
- Cite Club for Growth, FreedomWorks, NTU ratings when "RINO" or "weak" appears.
- Link to vote records, amendments, Epstein discharge petition.
- "Let's set the record straight" + Claim/Verdict structure for fact-checking.

Strategy 4: Ally amplification

Principle: When allies post in support, amplify. It dilutes the "Massie is alone" narrative.

Tactics:
- Quote-tweet Khanna, Davidson, Paul, Jordan when they post on war powers, Epstein, or Massie.
- "Two Republicans" / "bipartisan" framing when Khanna-Massie work is relevant.
- Share Responsible Statecraft, The Hill, local KY coverage that's favorable.

Strategy 5: Supporter segmentation

Principle: Different supporters care about different things. Rotate message angles.

Tactics:
- **Libertarian:** Constitutional restraint, omnibus no-votes.
- **Anti-war:** Iran, $8T, "radicalize new terrorists."
- **Transparency:** Epstein files, DOJ, discharge petition.
- **Fiscal:** Foreign aid in appropriations, deficit.
- **KY-4:** Local ties, district events, Rand Paul.

Strategy 6: Adversary engagement rules

Principle: Don't feed the trolls. Don't make it personal. State principle and move on.

Tactics:
- **Gallrein:** Rarely mention by name. When contrast is needed: "Principle over endorsement" or "Record speaks."
- **Trump:** No personal attacks. Reframe his vocabulary. Conciliatory option: narrative-action alignment (advise, don't insult).
- **MAGA spam:** Fact-check when false; ignore when noise. Don't quote-tweet every attack.

Strategy 7: Recursive learning

Principle: Track what gets engagement (likes, RTs, replies). Double down on what works.

Tactics:
- Note which topics resonate: Iran, Epstein, foreign aid, constitutional.
- Note which formats work: singles vs threads, quote-tweets vs original.
- Feed observations back; refine drafts.

Checklist for SMM when reviewing drafts

Voice:
- [ ] Does it sound like Massie's voice (direct, declarative, principle-first)?
- [ ] Avoid "Mr. President" — Massie doesn't use it.
- [ ] Singles: 1–2 sentences; threads: 🧵, numbered or structured.
- [ ] Reframe opponent vocabulary when useful (America First, MAGA).

- [ ] Evidence-based; no unsourced claims.
- [ ] Professional, analytical — not partisan slash-and-burn.
- [ ] When advising/critiquing: state principle, let implication land; don't over-explain.

Audience & tactics:
- [ ] Elevate Massie; don't attack adversaries by name unless necessary.
- [ ] Which segment does this serve? (ally amp, supporter energize, adversary counter)
- [ ] Does it follow adversary engagement rules? (no personal attacks; reframe; fact-check)

Training material for Xavier. Agent drafts; SMM reviews against this spec before posting. Update as new calibration exercises complete.

Account spec — @usa_first_ky

Source file: `docs/skill-work/work-politics/account-x.md`

Account identity: Operate the X (Twitter) account **"America First Kentucky"** (handle `@usa_first_ky`) as **unofficial independent analysis & message support** for Rep. Thomas Massie (R-KY-4). Not the official campaign, not an office, and not the principal speaking in his official capacity.

Strategic role: The `@usa_first_ky` account is a **prototype message-support channel** — a live demo that proves the workflow (briefs, research, message discipline, X drafts). The same offer can be sold to other campaigns once demonstrated in the wild.

Account spec

Field	Value
Handle	**@usa_first_ky**
Display name	America First Kentucky (Unofficial)
Bio	One-line: "Unofficial independent analysis & message support for KY-4 (Thomas Massie). Not affiliated with any campaign or office."
Operator	**Xavier** (social media manager). Agent drafts; Xavier implements and posts.

Services & payment

Field	Value
Offer	Political consultant services (briefs, research, opposition tracking, message discipline, X copy). Draft-only; campaign approves.
Price	**0.1 BTC**
Bitcoin address	`bc1q2leye50y420d20hzvv9tjv888v5c8tznhnp78j`
Receipts	Companion issues receipt per payment (amount, date, scope).

Guidelines

Do	Don't
Share briefs, vote context, and issue analysis that support the principal's documented positions.	Speak as the principal or as official campaign.
Quote principal's public statements and votes with sources.	Make promises or commitments on behalf of the principal or campaign.
Track and summarize opposition moves, endorsements, and narrative (with citations).	Post unsourced claims or speculation.
Draft threads and single tweets for Xavier to review and post.	Let the agent post directly (no API posting; Xavier publishes).
Correct the record when misattributed or misquoted, with links.	Engage in personal attacks; keep tone analytical and evidence-based.

Tone: Professional, evidence-based, pro–principal but not partisan slash-and-burn. Shadow = behind-the-scenes support made visible, not attack account.

X strategy (innermost loop)

Goal	Action
Respond	Reply to, quote, and amplify Massie's X posts.
Engagement	Increase engagement and follower count for Massie.
Opinion	Sway public opinion in favorable direction.
Demonstrate	Highlight principal's strengths (positions, record, message discipline).
Learn	Recursively learn from what works; tighten the loop.

Innermost loop: Social media manager **Xavier** implements this plan through the election (KY-4 primary May 19, 2026). **Compensation:** 0.1 BTC base to execute; 0.1 BTC bonus if Massie wins. Hired 2026-03.

Workflow

1. **Companion or Xavier** requests: e.g. “draft a thread on Massie’s war powers vote” or “tweet about today’s Epstein file drop.”
2. **Agent** drafts tweet(s) or thread using principal-profile.md and cited sources; outputs for review.
3. **Xavier** edits if needed and posts from the account.
4. **Optional:** Stage “we posted X” as ACT- evidence after approval for Record continuity.

Working queue: use content-queue.md to track what is only an idea, what is in draft, what is ready for review, and what has already been posted.

High-stakes briefs: For war powers, ethics / insider framing, high-claim “cartel economy” copy, or border + civil liberties in a hot news window — complete america-first-ky/stress-test-brief-template.md (see guardrail-stress-test.md) before Xavier ships. Optional dated scaffold: `python scripts/scaffold_stress_test_brief.py <issue-slug>`.

SMM onboarding

New hire (Xavier)? Start with **smm-xavier-handbook.md**, then smm-onboarding-packet.md and smm-day1-checklist.md.

Full curriculum (modules, outcomes, assessments): smm-onboarding-curriculum.md.
Extended pack (rhythm, KPIs, templates): externals/massie/smm-training/README.md.

Voice calibration: smm-training.md. SMM reviews drafts against Massie's verified voice before posting.

Content ideas (agent can draft on request)

- Vote explainers (war powers, Judiciary, T&I).
- Epstein files / DOJ release context.
- Opposition tracking (Gallrein, outside spend, Trump visits) — factual summary with links.
- District and legislative calendar (key dates, district events).
- Message discipline: short rebuttals or talking points when principal is misquoted or narrative is off.

Account is operated by Xavier (SMM). Agent drafts; Xavier posts. No autonomous posting. X: @usa_first_ky.

Principal profile — Thomas Massie (KY-4)

Source file: `docs/skill-work/work-politics/principal-profile.md`

Role: U.S. Representative, Kentucky’s 4th Congressional District (KY-4).
Party: Republican (libertarian-leaning).
In office: Since November 2012.

Bio (summary)

Field	Detail
Full name	Thomas Harold Massie
Born	January 13, 1971, Huntington, W.Va.; raised Vanceburg, Ky.
Education	B.S. and M.S. in engineering (MIT). Invented haptic touch technology; founded SensAble Technologies.
Before Congress	Lewis County Judge Executive (2011–2012).
Committees	House Transportation & Infrastructure; House Judiciary.
Personal	Married (Rhonda); four children; cattle farm in Kentucky.

Current race (2026)

Field	Detail
Cycle	2026 (reelection, KY-4).
Primary opponent	Ed Gallrein — farmer, former Navy SEAL; endorsed by Donald Trump.
Trump posture	Trump has attacked Massie (e.g. "moron," "lightweight," "loser") and campaigned in the district; outside spending (~$5M) supporting Gallrein.
Principal's posture	Critic of Trump on Iran/war powers and transparency (Epstein files).

Key issues (documented for briefs)

Issue	Principal's documented stance / context
War powers / Iran	Co-sponsored war-powers resolution (with Rep. Ro Khanna, D) to require congressional approval for continued military action; only Republican sponsor. Argued Iran conflict "will radicalize new generations of terrorists"; criticized U.S. Middle East intervention track record.
Epstein files	Pushed for release of Jeffrey Epstein–related documents; DOJ released related files in 2026. Public line: "Bombing a country on the other side of the world will not make Epstein's files disappear."
General	Libertarian Republican; Tea Party–aligned; emphasis on limited government, civil liberties, and congressional prerogatives.

Full Iran / war-powers and Twelve-Day War research: iran-foreign-policy-brief.md.

Opposition (tracking)

Entity	Role	Notes
Ed Gallrein	Primary opponent	Farmer, former Navy SEAL; Trump-endorsed.
Trump / MAGA	Opposing principal	Endorsement of Gallrein; campaign appearances in district; significant outside spend.

Update this profile as the race and context change. Source claims; stage new facts for Record via RECURSION-GATE.

Principal profile — Ro Khanna (CA-17, demo context)

Source file: `docs/skill-work/work-politics/khanna-principal-profile.md`

Role: U.S. Representative, California's 17th Congressional District (CA-17).
Party: Democrat (progressive / tech-district populist).
In office: Since January 2017.

Bio (summary)

Field	Detail
Full name	Rohit Khanna
Born	September 13, 1976, Philadelphia, Pa.; parents immigrated from India.
Education	B.A. in economics (University of Chicago); J.D. (Yale Law School).
Before Congress	Deputy Assistant Secretary of Commerce (Obama administration, 2009–2011); lawyer; taught economics at Stanford.
Committees	Armed Services (cyber / innovation subcommittee); Strategic Competition with China; Oversight and Accountability; leadership role in Congressional Progressive Caucus (vice chair).
District	CA-17 — core of Silicon Valley (Cupertino, Santa Clara, Sunnyvale, parts of San Jose, Fremont, Newark, Milpitas). Heavily Democratic, high-income, tech-heavy.

Current race (2026)

Field	Detail
Cycle	2026 (reelection, CA-17).
Primary opponent	Ethan Agarwal — tech entrepreneur, ~40, backed by prominent Silicon Valley investors.
Primary fault line	Khanna's support for a wealth tax on billionaires and stricter rules on wealth / stock trading vs Agarwal framed as pro–tech founder / anti–wealth-tax.
Principal's posture	Positions himself as pro-worker, pro-innovation, and independent of big donors; emphasizes wealth-tax stance, war-powers work, and transparency as proof he is not captured by local elites.

Key issues (documented for briefs)

Issue	Principal's documented stance / context
War powers / Iran	Vocal critic of launching or continuing the Iran war without constitutional authorization; co-led a bipartisan War Powers push with Rep. Thomas Massie to require Congress to vote. Argues gas prices are up, the regime is still in power, and U.S. actions helped "create a threat" that was not imminent before.
Wealth tax / tech tension	Supports a California wealth tax (e.g. one-time 5% on billionaires) and federal wealth-tax efforts; this sparked a tech-backed primary challenge from Agarwal and high-profile Silicon Valley investors. Frames it as asking the wealthiest to contribute fairly to workers and public goods.
Epstein transparency	Worked on an Epstein Files Transparency effort (with Massie and others) to compel release of documents related to the Epstein case; framed as a transparency and anti-impunity issue rather than a partisan weapon.
General	Progressive Democrat representing a tech-district: talks about industrial policy, worker power, antitrust, and digital rights while keeping a "pro-innovation but not captured by billionaires" identity.

Opposition (tracking)

Entity	Role	Notes
Ethan Agarwal	Primary opponent	Tech entrepreneur challenger backed by notable Silicon Valley investors; attacks Khanna over wealth-tax support and stock trades ("Trader Ro" line).
Tech donor bloc	Issue-aligned opposition	Some prominent tech investors publicly oppose Khanna's wealth-tax stance and back Agarwal; useful to track as a collective narrative, not just individuals.

Update this profile as the race and context change. Source claims; keep explicit citations in briefs when referencing specific numbers or quotes.

Opposition brief — Gallrein, Trump/MAGA

Source file: `docs/skill-work/work-politics/opposition-brief.md`

Living doc. Agent updates when companion requests; cite sources. Stage new claims for Record via RECURSION-GATE.

Ed Gallrein (primary opponent)

Field	Detail
Role	Primary opponent, KY-4 2026.
Profile	Farmer; former Navy SEAL.
Endorsements	Donald Trump.
Narrative / messaging	*(Add as race develops: themes, ads, social.)*
Vulnerabilities / angles	*(Add when research supports; source everything.)*
Spending / activity	*(Track FEC, outside spend; update when we have numbers.)*

Last updated: from principal-profile; expand with research.

Trump / MAGA (opposing principal)

Field	Detail
Posture	Trump has attacked Massie ("moron," "lightweight," "loser"); endorsed Gallrein; campaigned in district.
Outside spending	~$5M supporting Gallrein (as of documented date).
Narrative	*(Add: MAGA messaging against Massie, war powers, Epstein, etc.)*

Spending summary (update when new data)

Source	Amount / period	Notes
Outside (pro-Gallrein)	~$5M	As of principal-profile snapshot.
(Add Gallrein committee, Massie committee, other PACs when needed.)		

Narrative lines to watch

Line	Who's pushing	Principal's counter (documented)
(e.g. "Massie is anti-Trump")	*(Opposition)*	*(Principal's war powers / transparency stance; not party loyalty.)*
(Add as race develops.)		

Request "update opposition brief" with topic (e.g. Gallrein spending, Trump visit) to refresh. Source all entries.

Massie KY-4 — operator checklist (doctrine, brief template, monitoring)

Source file: `docs/skill-work/work-politics/clients/massie-ky4-operator-checklist.md`

Purpose: Calibrate work-politics for the Thomas Massie campaign. Human-always-approves public ship; work-politics territory + `channel_key` `operator:wap:us-ky4-massie`. See massie-ky4.md for canonical links.

Doctrine filter (every artifact)

Before shipping or merging work-politics candidates, ask:

- Does this strengthen **engineer/farmer, anti-waste, anti-surveillance/war** framing?
- Does it avoid **forced culture-war cosplay** that isn't Massie?
- Is it **one KY-4 sentence** explainable to a neighbor?

Data sources

Bucket	Sources (adjust to campaign access)
Official record	House roll calls, releases, committee work
District	KY-4 county news, local radio, ag / manufacturing / NKY business press
Money	FEC (Massie + primary opponent(s)), donor narratives
Field / vibe	County GOP, door reports, town halls, internal notes
Opposition	Opponent sites/social, hits, debate clips
National spillover	Only if it **lands locally**

Weekly brief template

1. **Headline reality** — One paragraph: race position (primary clock, money, noise).
2. **Votes / record** — 2–3 bullets + one local explanation line each; pull at least one asymmetry candidate from massie-issue-asymmetry.md when useful.
3. **Earned + social** — What broke; repeat or drop.
4. **Opposition** — Their moves; **pre-buttal** (short, factual).
5. **Fundraising** — Week theme + one "why give now."
6. **Field / local** — County notes; one ask per region if useful.
7. **Risks** — Missteps; counsel/compliance flags.
8. **Next week** — Three numbered human-owned priorities.

Align with generate_wap_weekly_brief / operator weekly rhythm.

Monitoring list (standing)

- Massie: official social, house.gov, campaign email archive.
- Primary opponent(s): site, FEC, social, name + "KY-4" alerts.
- Local: 3–5 outlets that cover the district.
- Votes: upcoming bills on spending, war, surveillance, mandates.
- Calendar: calendar-2026.md, filing deadlines, debates, county events.

Cadence: daily light oppo/media scan; weekly full brief.

One-week pilot (operator)

Day	Actions
Mon	Log weekend activity ("we did X"); monitoring pass; stage 3–5 work-politics gate notes if useful.
Tue	Draft brief §1–4; doctrine pass.
Wed	Fundraising + field; one-line pre-buttals; stage drafts — **no public ship without approval**.
Thu	Gate review; merge **work-politics territory** only for Massie (`--territory wap`); brief to decision-maker.
Fri	Final brief + three next-week priorities; retro monitoring list.

Last updated: March 2026

Massie — issue asymmetry map (primary + general)

Source file: `docs/skill-work/work-politics/clients/massie-issue-asymmetry.md`

Purpose: Map where Thomas Massie's record and voice are clearly different from (a) primary opponents, (b) general opponents, and (c) a "generic Republican," on issues that matter in KY-4, then package those gaps into doctrine-safe wedges for both the primary and the general.

Doctrine filter: See `massie-ky4-operator-checklist.md` — every wedge should:

- Strengthen **engineer/farmer**, **anti-waste**, **anti-surveillance/war** framing.

- Avoid **forced culture-war cosplay** that isn't Massie.
- Collapse to **one KY-4 sentence** explainable to a neighbor.

---

1. Issue buckets

Working buckets tuned to current profile; add/merge as race develops.

1. **Spending & waste** — trillions, bailouts, COVID-era spending, earmarks, debt ceiling.
2. **War, peace & foreign policy** — Iran, Middle East interventions, war powers, authorizations.
3. **Surveillance & civil liberties** — FISA, Patriot Act, data collection, censorship pressure.
4. **Congressional power & process** — separation of powers, emergency powers, rules, transparency.
5. **Agency & regulatory overreach** — unelected agencies, mandates, ESG-style nudges.
6. **Food, land & homestead** — small farms, property rights, food freedom, rural infrastructure.
7. **Energy & environment (KY-4 lens)** — power bills, grid, regulation that hits local industry.
8. **Guns & self-defense** — Second Amendment, red-flag frameworks, federal overreach.
9. **Health freedom & mandates** — COVID-era positions, medical autonomy, federal dictates.
10. **Tech, money & markets** — Bitcoin/crypto, financial surveillance, banking/AML creep.
11. **Education & local control** — federal vs local say, school culture fights as they land locally.

---

2. Asymmetry matrix (snapshot)

Each row is one potential wedge; the goal is not to ship all of them, but to see **where Massie is alone or early**, where opponents are late, silent, or generic, and what actually matters in KY-4.

Issue bucket	Massie receipt (example)	Primary gap (Gallrein / MAGA line)	General gap (D / national Dem line)	Primary salience (1–5)	General salience (1–5)	Differentiation strength (1–5)	Doctrine OK (Y/N)
War, peace & foreign policy	Co-sponsored Iran war powers resolution with Ro Khanna; only R sponsor. Publicly warned Iran conflict would "radicalize new generations of terrorists."	Trump/Gallrein world leans into "peace through strength"; attacks Massie as weak or disloyal to Trump. Little record of standing up to own side on war powers.	National Ds talk restraint but often vote for interventions; no one in the race has Massie's combination of R label + documented anti-war votes.	5	4	5	Y
Surveillance & civil liberties	Long track of opposing mass surveillance; aligns civil-liberties language with KY privacy instincts (government out of your life and phone).	MAGA infrastructure tolerates surveillance when framed as "tough on crime/terror"; little evidence they would buck leadership on FISA.	Ds split between civil-liberties rhetoric and support for surveillance tools; hard to find a clean, consistent record.	4	4	4	Y
Congressional power & process	Emphasizes Congress' role on war, spending, and transparency (Epstein files push; "you elect a Representative, not a rubber stamp").	Challenger positioned as team player with Trump; no clear record on reining in executive when it costs intra-party goodwill.	National Ds often defer to "their" executive on process fights; generic opponent unlikely to run on Congress clawing back power.	4	3	4	Y
Food, land & homestead	Lives the farmer story; cattle farm. Record and lifestyle align	Gallrein shares farmer identity; asymmetry will come from	D opponent likely to frame ag via federal programs and	3	3	3	Y

Issue bucket	Massie receipt (example)	Primary gap (Gallrein / MAGA line)	General gap (D / national Dem line)	Primary salience (1–5)	General salience (1–5)	Differentiation strength (1–5)	Doctrine OK (Y/N)
	on small-farm respect and property rights.	**record on federal lever pulls**, not biography.	regulation; less aligned with anti-bureaucracy, pro-sovereign-farmer instinct.				
Health freedom & mandates	COVID-era skepticism of federal mandates; emphasis on individual and family decision-making.	Trump world carries baggage from early COVID positions and later rewrites; challenger must navigate loyalty vs hindsight.	Ds often align with federal public-health authority; hard to offer "we'll leave you alone next time" while defending mandates.	4	4	4	Y

Scoring legend (tunable as race evolves):

- **Primary / General salience:** 1–5 (1 = niche; 5 = felt weekly in KY-4 life).
- **Differentiation strength:** 1–5 (1 = talking point; 5 = lonely, documented stand).

---

3. Flagship wedges (dual-salience candidates)

These are **hypothesis-level** flagship issues that appear strong for both the primary and the general, given current documentation.

1. **Anti-stupid war (war powers / Iran)**
2. **Why primary:** Only R on a bi-partisan war powers push; took heat for restraining a Republican president; records courage vs crowd.
3. **Why general:** Voters of all stripes are tired of endless wars that don't fix anything and cost lives and money; "don't send our kids to a war Congress never voted on" is crossover-safe.

4. **Receipts:** Iran war powers co-sponsorship; floor remarks about radicalizing new terrorists; documented criticism of bombing as distraction from Epstein transparency.

5. **Transparent, accountable government (Epstein files + process)**

6. **Why primary:** Shows independence from leaders and donors; "I pushed to open the files when both parties were quiet."
7. **Why general:** Cuts across partisan lines — people who think powerful people get away with everything.

8. **Receipts:** Epstein files push; quotes tying transparency to trust in institutions.

9. **Liberty at home (surveillance, mandates, overreach)**

10. **Why primary:** Distinguishes Massie from tough-on-crime rhetoric that quietly expands the surveillance state.
11. **Why general:** Pairs privacy and health freedom with a "government out of your home, your phone, and your doctor's office" line; accessible beyond base.
12. **Receipts:** Anti-surveillance votes; COVID-era skepticism of federal dictates.

These can be re-scored or swapped as more race-specific data comes in (ads, debate lines, local stories).

---

4. Wedge cards (draft shells)

4.1 Primary wedge — "The Republican who voted against dumb wars"

- **Claim (primary-friendly):** When both parties sleepwalk toward another Middle East war, Massie is the Republican who forces Congress to vote before your son or daughter is sent.
- **Receipts:**
- Only Republican co-sponsor of the Iran war powers resolution with Ro Khanna.
- Floor remarks warning an Iran conflict would radicalize new generations of terrorists.

- **Contrast line:** Ed Gallrein is running with people who cheer any strike Trump orders; Massie is the one who reads the fine print before we bleed and borrow.
- **Neighbor sentence (KY-4):** "I want the guy who makes them vote before they send our kids and grandkids."
- **Avoid:** Anything that sounds soft on defense; always anchor in "strong, careful, constitutional" instead of "anti-military."

4.2 Primary wedge — "Engineer who reads the bill, not the room"

- **Claim:** Massie is the engineer-farmer who votes the math and the Constitution, even when leadership is yelling.
- **Receipts:**
- Pattern of lone or small-cluster votes against omnibus spending and emergency packages that balloon debt.
- Public explanations that connect line items to KY-4 waste.
- **Contrast line:** While others wait to see how Trump or leadership lean, Massie tells you how he voted and why in one KY-4 sentence.
- **Neighbor sentence:** "He votes the numbers, not the noise."
- **Avoid:** Direct attacks on base-friendly figures; keep focus on **process and outcomes**, not intra-party drama.

4.3 General wedge — "Keep government out of your home and phone"

- **Claim:** Massie is the one in the race who has actually voted to stop the government from reading your messages and dictating your family's health choices.
- **Receipts:**
- Anti-surveillance votes; opposition to warrantless spying.
- COVID-era resistance to federal mandates and one-size-fits-all rules.
- **Contrast line:** Others talk about freedom; Massie has a voting trail where he told both parties "no" when they wanted more power over your life.
- **Neighbor sentence:** "He's the one who kept D.C. out of our phones and out of our doctor's office."
- **Avoid:** Technical surveillance jargon; keep it at "they shouldn't be watching you or bossing your family around."

4.4 General wedge — "Farmer who fights bureaucrats, not neighbors"

- **Claim:** Massie is the local farmer who wants fewer distant bureaucrats telling KY-4 how to work their land, run their small business, or school their kids.
- **Receipts:**
- Cattle farm and rural life as lived experience.
- Record against federal overreach that hurts small farms and small business.
- **Contrast line:** Opponents offer more programs from far away; Massie wants decisions closer to the people who actually live with them.
- **Neighbor sentence:** "He's on our side when the folks with clipboards come telling us how to live."
- **Avoid:** Blanket anti-government language that sounds like abandoning needed local services; focus on **who decides**.

---

5. Weekly brief & monitoring hooks

- **Weekly brief hook:** Under "Votes / record" or "Opposition," add one bullet: "Asymmetry this week — [issue]: [one-sentence wedge + receipt]."
- **Monitoring:** When the monitoring list flags upcoming votes on spending, war, surveillance, or mandates, pre-draft how a YES/NO would alter the asymmetry matrix before the vote.
- **Refresh cadence:** Re-score matrix and flagship list monthly or after any major vote, Trump statement, or Gallrein move that touches a flagship bucket.

SMM onboarding curriculum — modules M0–M5

Source file: `docs/skill-work/work-politics/smm-onboarding-curriculum.md`

Audience: New social media manager (Xavier) and anyone shadowing X ops.
Companion use: Assign modules by week; use "show you know" checks before expanding posting authority.

Learning outcomes (end of onboarding)

By the end of **Week 2**, the SMM can:

1. **Explain** who **Thomas Massie** and **Ro Khanna** are in plain terms, and how **US House** elections and **primary vs general** work — **without assuming prior American civics knowledge** (see smm-training.md § US politics + Who is Massie/Khanna).
2. **State** the account's legal/ethical positioning (unofficial analysis; not the principal, not the campaign/office) and apply it to every post.
3. **Run** the draft review loop: agent or advisor produces copy → SMM checks voice + sourcing + doctrine → SMM publishes (no auto-post).
4. **Use** Massie's documented record and voice patterns (principal-profile, smm-training) without inventing positions.
5. **Route** high-stakes topics (war powers, Epstein/DOJ, hot Trump window) through the stress-test path when the companion requires it.
6. **Read** the work-politics client doctrine (KY-4 neighbor sentence; engineer/farmer; anti-waste / anti-surveillance / anti-stupid-war) and reject drafts that violate it.

Module map

Module	Topic	Time	Primary docs	"Show you know"
M0	Orientation & access	30–60 min	smm-onboarding-packet.md, smm-day1-checklist.md, smm-access-checklist.md	You can explain in one sentence who may publish and who the account is *not*.
M0b	US civics + who are Massie & Khanna	45–60 min	smm-training.md (sections *before* Massie's X voice), principal-profile.md, khanna-principal-profile.md	You can explain House vs Senate, primary vs general, and why Massie and Khanna appear in the same training without being "the same politics."
M1	Account spec & workflow	45 min	account-x.md, content-queue.md	You describe the innermost loop (respond, engage, opinion, demonstrate, learn) in your own words.
M2	Voice & review discipline	60–90 min	smm-training.md (voice + checklist), principal-profile.md	You take one weak draft and list **three** concrete fixes using the SMM checklist in smm-training.
M3	Opposition & narrative	45 min	opposition-brief.md, clients/massie-issue-asymmetry.md	You name one **elevate-don't-attack** tactic and one **reframe vocabulary** tactic without looking at notes.
M4	Doctrine & KY-4 plain language	30 min	clients/massie-ky4-operator-checklist.md § doctrine filter	You rewrite one jargon-heavy line into **one KY-4 sentence** a neighbor would get.
M5	Cadence, KPIs, approvals	45 min	Externals: daily rhythm & KPIs, approval workflow, KPI scorecard	You write your weekly recurring calendar blocks (e.g. morning scan, review queue, weekly retro).

Optional deep dives (as assigned):

Topic	Doc
Week-one ramp (7 days)	Externals: week-1 ramp plan
Content formats & pitfalls	Externals: content playbook
Copy-paste shells	Externals: templates
Iran / war powers context	iran-foreign-policy-brief.md
High-stakes briefs	america-first-ky/guardrail-stress-test.md, america-first-ky/stress-test-brief-template.md
Mission / platform (communication only)	Externals: mission, policy platform

---

Agent-assisted draft generation (optional tool)

When the **companion or operator** runs the Cursor skill **Massie X — real-time news search and draft posts**, output is **draft-only** for SMM review. SMM still applies smm-training.md and account rules before any publish.

- Skill: `.cursor/skills/massie-x-news-search-draft/SKILL.md` (repo root)
- Operator dashboard (paste outputs): wap-dashboard.md

Compliance & escalation (read once)

Item	Where
Federal / engagement gates (big picture)	compliance-checklist.md
SMM never promises votes, endorsements, or office actions on behalf of the principal	account-x.md
Unclear if a post is “official” enough?	Stop; ask companion. Do not improvise authority.

Order of operations (recommended)

1. Complete **M0** same day as access handoff.
2. **M1–M2** before first unsupervised post.
3. **M3–M4** before first reply to a high-attention account or first thread on war/Epstein.
4. **M5** by end of Week 1.
5. Revisit **M2** monthly or after any voice miss (bad RT ratio, correction needed, companion flag).

Human-always-approves public ship. This curriculum does not replace campaign counsel; it organizes internal training.

SMM — Day 1 checklist

Source file: `docs/skill-work/work-politics/smm-day1-checklist.md`

Purpose: Clear runbook for your first day. Check off as you go.
Curriculum: You are completing **M0 — Orientation & access**; full module map is in smm-onboarding-curriculum.md.

Before you start

- [ ] You have X (Twitter) account access for @usa_first_ky (login, 2FA if applicable)
- [ ] You have access to this repo or the onboarding docs (companion provides)

Morning: orientation

- [ ] Read smm-onboarding-packet.md top to bottom
- [ ] Read smm-training.md **from the top** — **US politics basics**, **who Massie is**, **who Khanna is** (do not skip if you are new to US civics); then voice + checklist
- [ ] Read account-x.md — account spec, guidelines, X strategy
- [ ] Skim principal-profile.md — who Massie is, key issues
- [ ] Skim khanna-principal-profile.md once — why Khanna appears in training (demo / war-powers overlap); not your main X lane unless assigned

---

Midday: access and baseline

- [ ] Log into @usa_first_ky on X; confirm you can view and post
- [ ] Capture baseline metrics (companion or you): follower count, recent engagement — for "before/after" in 30 days

---

Afternoon: first posts (optional)

- [ ] Review 3 pre-queued draft posts (companion provides; or request from agent)
- [ ] Run each draft through the smm-training checklist
- [ ] Post 1–2 approved posts (or schedule if preferred)
- [ ] Optional: Try one calibration post (e.g. narrative-action alignment) — see smm-training calibration exercise

---

End of day

- [ ] Confirm workflow: how do you request new drafts? (Companion, Telegram, etc.)
- [ ] Note any questions for companion
- [ ] Skim externals: week-1 ramp so you know what’s coming (optional but recommended)
- [ ] You're set for Week 1 — next: M1–M5 in curriculum

Contact / workflow

Need	Who / How
Request new drafts	[Companion provides — e.g. "draft a thread on X" to agent]
Clarify strategy	Companion
Technical / access issues	Companion
Voice or tactic question	See smm-training; escalate to companion if unclear

Companion fills in specific contact (Telegram, email, etc.) before Day 1.

SMM — job description & compensation

Source file: `docs/skill-work/work-politics/smm-job-description.md`

Position: Social Media Manager, @usa_first_ky (America First Kentucky, Unofficial Analysis & Message Support)
Type: Contract / engagement through election
Hired: 2026-03. Incumbent: Xavier.

Formal job description

Title

Social Media Manager — Shadow Campaign (X / Twitter)

Summary

Operate the X (Twitter) account **@usa_first_ky** as **unofficial independent analysis & message support** for Rep. Thomas Massie (R-KY-4). The account provides analysis, context, and message support — not as the official campaign, and not as an office. The role implements a defined X strategy through the KY-4 primary (May 19, 2026), with content drafted by an AI agent and reviewed and posted by the SMM.

Responsibilities

- **Execute X strategy:** Respond to Massie's posts; quote and amplify his content; increase engagement and follower count for the principal; sway public opinion in a favorable direction; demonstrate principal's strengths (positions, record, message discipline).
- **Content operations:** Review drafts provided by the agent; edit for voice and authenticity; post to @usa_first_ky. Ensure tone is professional, evidence-based, and pro-principal without partisan slash-and-burn.
- **Voice calibration:** Maintain consistency with the principal's verified X voice (direct, declarative, principle-first). Use provided training materials for authenticity checks.
- **Recursive learning:** Observe what works; feed back into the loop to improve future drafts and engagement.
- **Compliance:** Post only reviewed content; no autonomous posting. Do not make promises or commitments on behalf of the principal or campaign. Cite sources; correct the record when misattributed.

Qualifications

- Experience with X (Twitter) content strategy and community management.
- Ability to match voice and tone to a documented persona.
- Comfort with AI-drafted content and iterative editing.
- Familiarity with U.S. political context (Kentucky 4th District, congressional races) helpful but not required.

Compensation

- **Base:** 0.1 BTC for implementing the X plan through the election (KY-4 primary May 19, 2026).
- **Bonus:** 0.1 BTC if the principal wins the primary.
- **Total potential:** 0.2 BTC.

Duration

Through KY-4 primary, May 19, 2026. Scope may extend or pivot based on outcome.

Reporting

Reports to the companion (operator). Receives drafts from the agent; coordinates requests and feedback through the companion or directly as agreed.

Reference materials

- account-x.md — Account spec, guidelines, workflow
- smm-training.md — Voice calibration, authenticity checklist
- principal-profile.md — Principal context and positions

Informal Telegram message version

```
hey — we're running an unofficial America First Kentucky analysis + message support X account for Thomas I

your job: respond to his posts, boost engagement, sway opinion, show off his strengths. we give you draft

pay: 0.1 BTC to run it through the primary (May 19). if he wins, another 0.1 BTC bonus. so 0.2 max.

it's a demo — we're proving the product with Massie so we can sell the same thing to other campaigns late

interested? we can walk through the workflow and training docs.
```

SMM — access checklist (companion)

Source file: `docs/skill-work/work-politics/smm-access-checklist.md`

Purpose: Companion runs this before Xavier starts. Ensures X account and handoff are ready.

Task 1: Confirm X account access

Step	Action	Done
1	Log into @usa_first_ky on X (Twitter). Confirm you can view the feed and post.	[ ]
2	If 2FA is enabled: ensure Xavier will receive codes, or add his device/number before handoff.	[ ]
3	Prepare credentials for Xavier: login email, password (or reset link), 2FA method. Use secure channel (Signal, in-person, etc.).	[ ]
4	If Xavier will use his own device: send invite to add @usa_first_ky to his X app, or provide login instructions.	[ ]
5	Verify Xavier can log in and post a test tweet (then delete if desired).	[ ]

Handoff note

Xavier needs: login + 2FA method. Companion decides when to send (e.g. Day 1 morning or day before). Document the handoff channel here:

Field	Value
Handoff channel	*[Telegram / Signal / email / in-person]*
Handoff date	*[TBD]*

Complete before Xavier's Day 1. See smm-workspace.md for his workspace link.

Content queue — @usa_first_ky

Source file: `docs/skill-work/work-politics/content-queue.md`

Structured queue for X / content operations.

This is a `WORK` queue, not a Record queue. Drafts here do not imply posting and do not merge into SELF.

ID	Status	Target date	Campaign moment	Format	Topic	Source doc	Notes
X-0001	idea	2026-04-13	Voter registration push	single post	Register before the Apr 20 deadline	`calendar-2026.md`	Turn into 1-2 short reminder posts
X-0002	draft	2026-03-18	Issue discipline	thread	Massie on war powers and congressional approval	`iran-foreign-policy-brief.md`	Draft should quote documented public lines
X-0003	review	2026-04-29	Early vote runway	single post	Early vote and absentee timing reminder	`calendar-2026.md`	Review against exact dates before posting
X-0004	idea	2026-03-20	Opposition framing	single post	Distinguish Massie posture from Trump/Gallrein attacks	`opposition-brief.md`	Needs fresh citations first

---

Status meaning

Status	Meaning
`idea`	Worth drafting; not written yet
`draft`	Draft requested or partially prepared
`review`	Ready for Xavier / companion review
`posted`	Published by human operator

Workflow

1. Add or update queue items here.
2. Ask the agent for drafts by `ID` or `Topic`.
3. Xavier or the companion reviews and posts.
4. If a posting milestone matters for audit continuity, stage it through `RECURSION-GATE`.

Calendar — KY-4 2026

Source file: `docs/skill-work/work-politics/calendar-2026.md`

Primary election day: Tuesday, **May 19, 2026**.

Key dates (already passed as of Mar 2026)

Date	Event
Nov 5, 2025	Earliest date to collect signatures on candidate filing forms
Dec 31, 2025	Last day to change party affiliation and be eligible to vote in primary
Jan 9, 2026, 4:00 PM	**Candidate filing deadline** (KY)
Jan 15, 2026	Public drawing for ballot positions
Jan 26, 2026	Secretary of State certifies candidate names to County Clerks

---

Between now and primary (Mar 9 → May 19, 2026)

Date	Event	Decision / action
Apr 20, 2026	**Voter registration deadline** (in-person and mail; mail = postmark)	Push registration in-district; remind supporters.
Apr 30 – May 16, 2026	**48-hour notices** (FEC)	Candidates must report contributions/expenditures within 48 hours when they occur in this window.
May 5, 2026	Mail-in absentee ballot request portal closes	Voters who need absentee must request by this date.

Date	Event	Decision / action
May 7, 2026	**FEC pre-primary report due**	Covers period Apr 1–Apr 29. Registration/certification & overnight mail deadline May 4.
May 14–16, 2026	**Early voting** (5 days through 3 days before election)	Thu–Sat; GOTV and "vote early" messaging.
May 19, 2026	**Primary election day**	Polls open; final GOTV.

Summary: decision points (Mar → May 19)

1. **Before Apr 20** — Registration drive; lock in supporter list and registration status.
2. **Before May 5** — Absentee outreach; anyone needing mail ballot must request by May 5.
3. **May 4 / May 7** — FEC pre-primary: certification/overnight by May 4, filing by May 7.
4. **Apr 30–May 16** — 48-hour FEC notices for any reportable activity; compliance and message timing.
5. **May 14–16** — Early vote window; maximize early turnout to bank votes.
6. **May 19** — Primary day; full GOTV.

Sources: Kentucky State Board of Elections 2026 calendar; FEC 2026 Kentucky primary election report notice. Update if state or FEC revises.

Iran / foreign policy — Massie context

Source file: `docs/skill-work/work-politics/iran-foreign-policy-brief.md`

Research package: statements, verbatim quotes, Twelve-Day War position, public opinion, executive summary (audience versions), and foreign-policy mission statement draft. Companion-led; cite sources. Stage any new claims for Record via RECURSION-GATE.

---

1. Recent statements (Iran war)

Context: As of early March 2026, the most recent public activity is the House vote on the war-powers resolution (March 5, 2026) and related floor speech and coverage through March 6. No newer statements surfaced in the past 24–48 hours from execution-time search; the below represents the current public record.

- **March 5, 2026:** House rejected the war-powers resolution co-sponsored by Massie and Rep. Ro Khanna (D-Calif.) by **212–219**. Massie was the lone Republican co-sponsor; only Rep. Warren Davidson (R-Ohio) joined him in voting yes.
  Sources: LINK nky (https://linknky.com/politics/2026/03/06/massie-unsuccessfully-pushes-us-house-to-restrain-trumps-war-power-in-iran/), Spectrum News 1 (https://spectrumnews1.com/ky/lexington/news/2026/03/05/house-rejects-massie-resolution), ABC News (https://abcnews.com/Politics/house-primed-vote-iran-war-powers-resolution/story?id=130788637), Union-Bulletin (https://www.union-bulletin.com/news/national/rep-massie-s-push-for-iran-war-powers-vote-fails-with-little-gop-support/article_d12c3210-fa71-56a2-aa54-8811d874aef4.html).

- **March 5, 2026 (floor):** Massie argued that "if American lives are to be risked and American blood is to be shed, that decision must be debated and voted on by the representatives of the American people"; warned that U.S. airstrikes "will radicalize new generations of terrorists" and "will not stabilize the region. It's already ignited the region"; said the conflict "will send more swarms of refugees into Europe and the United States"; suggested colleagues opposed the resolution because of "a terrible track record of meddling in the Middle East."

2. Verbatim quotes (Iran war, since escalation)

#	Quote	Date	Venue	Source
1	"I am opposed to this War. This is not 'America First.' When Congress reconvenes, I will work with @RepRoKhanna to force a Congressional vote on war with Iran. The Constitution requires a vote, and your Representative needs to be on record as opposing or supporting this war."	Feb 28, 2026	X (Twitter)	NKyTribune, Yahoo News, The Hill
2	"PSA: Bombing a country on the other side of the globe won't make the Epstein files go away, any more than the Dow going above 50,000 will."	Mar 1, 2026	X (Twitter)	NKyTribune, Yahoo, news.meaww.com

#	Quote	Date	Venue	Source
3	“Have we learned nothing from the laundry list of wars and regime change experiments we sparked across the Middle East, that have racked up a total of at least $8 trillion of debt in Iraq, Libya, Syria, Afghanistan?”	Mar 5, 2026	House floor	The Hill, AOL
4	“It will radicalize new generations of terrorists, and it will send more swarms of refugees into Europe and the United States.”	Mar 5, 2026	House floor	The Hill, AOL
5	“The ayatollah was not a president, he was a religious leader from a region notorious for radical Islamists. And the United States and Israel turned him into a martyr.”	Mar 5, 2026	House floor	The Hill, AOL
6	“Congress must decide war.”	Mar 5, 2026	House floor	The Hill
7	“If American lives are to be risked and American blood is to be shed, that decision must be debated and voted on by the representatives of the American people.”	Mar 5, 2026	House floor	LINK nky, Spectrum News 1
8	“It will not stabilize the region. It’s already ignited the region.”	Mar 5, 2026	House floor	The Hill
9	“This is not constitutional.” (re: Trump’s bombing of Iranian nuclear sites)	2026	X / press	The Hill (policy/defense)
10	“Acts of War Unauthorized by Congress.” (re: Trump’s Iran strikes)	2026	Press / statement	Yahoo News
11	“This is not our war. Even if it were, Congress must decide such matters according to our Constitution.”	June 2025	Re: Twelve-Day War	Politico
12	“There was no imminent threat.” (re: Iran strikes)	June 2025	With Khanna	Politico
13	“The procedure should have been Congress be briefed before we decided to enter war and actually have a vote on it.”	June 2025	Press	Politico

---

3. Position on the Twelve-Day War (2025)

Twelve-Day War: Direct Israel–Iran conflict **June 12–24, 2025**; ceasefire June 24 with U.S. and Qatar mediation. Israel’s Operation Rising Lion targeted Iranian military and nuclear-related infrastructure; Iran responded with missile strikes (e.g. Al Udeid, Qatar).

Massie’s position: Massie opposed U.S. military involvement. He co-sponsored a War Powers Resolution with Rep. Ro Khanna in **June 2025** to block U.S. involvement without congressional authorization and was the **sole Republican sponsor**. He argued there was “no imminent threat” to justify military action and that Congress should have been briefed and voted before any decision to enter war. He indicated he would withdraw the resolution if the Iran–Israel ceasefire held.
Sources: Politico (June 17, 2025) (https://www.politico.com/live-updates/2025/06/17/congress/thomas-massie-iran-resolution-war-powers-00410454), Politico (June 22, 2025) (https://www.politico.com/news/2025/06/22/massie-khanna-iran-strikes-constitution-00417380), Politico (June 23, 2025) (https://www.politico.com/live-updates/2025/06/23/congress/massie-backs-off-war-powers-vote-00419550).

---

4. Public opinion polling

Poll	Date	Key findings	Link
CNN	Mar 2, 2026	59% disapprove of Iran strikes; 56% say long-term conflict likely; 62% say Trump should seek congressional approval; 60% say Trump lacks clear plan; 27% feel U.S. made adequate diplomatic efforts; 12% favor sending U.S. ground troops.	CNN Politics
Reuters/Ipsos	Mar 1, 2026	~27% approve of U.S. strikes; 56% say Trump too willing to use military force.	Reuters
NPR	Mar 6, 2026	Majority oppose military action in Iran; 54–60% disapprove of Trump’s handling.	NPR
PBS NewsHour	2026	Majority of Americans oppose military action in Iran.	PBS

Partisan split: Republicans ~77–84% support the action; Democrats ~82–86% oppose. A majority of Americans favor congressional approval for further military action.

---

5. Executive summary (by audience)

For a peer legislator (e.g. 50-year-old congressman)

Rep. Thomas Massie (R-KY-4) has been the only Republican co-sponsor of a War Powers Resolution with Rep. Ro Khanna (D-Calif.) to require congressional authorization for continued U.S. military action against Iran. The resolution failed in the House 212–219 on March 5, 2026, with only one other Republican (Warren Davidson) voting yes. Massie's position is that the Constitution vests the power to declare war in Congress; that the executive has not met the conditions of the 1973 War Powers Resolution (no declaration of war, no specific statutory authorization, no national emergency from an attack on the U.S.); and that Congress should be briefed and vote before American lives and resources are committed. He has held the same stance since the June 2025 Twelve-Day War (Israel–Iran), when he also co-sponsored a war-powers measure and argued there was no imminent threat justifying unilateral action. Public polling shows a majority of Americans disapprove of the strikes and believe the president should seek congressional approval for further military action.

For general voter / constituent

Thomas Massie is against the U.S. going to war with Iran without a vote in Congress. He says the Constitution gives that decision to Congress, not the president, and that your representative should be on the record for or against. He pushed for that vote with Democrat Ro Khanna; the House rejected the measure in early March 2026, with Massie as the only Republican co-sponsor. He's also said that bombing Iran won't make other problems (like the Epstein files) go away. Most Americans in recent polls disagree with the strikes and want the president to get Congress's approval before more military action.

For media / campaign staff (or donor)

Headline: Massie remains lone GOP sponsor of Iran war-powers measure; House rejects resolution 212–219.

Takeaways:
- Only Republican co-sponsor of Khanna war-powers resolution; only one other Republican (Davidson) voted yes.
- Message: "Congress must decide war"; "If American lives are to be risked… that decision must be debated and voted on by the representatives of the American people."
- Epstein line: "Bombing a country on the other side of the globe won't make the Epstein files go away."
- Twelve-Day War (June 2025): Same posture—no U.S. involvement without congressional vote; "no imminent threat"; would withdraw resolution if ceasefire held.
- Polling: Majority of Americans disapprove of Iran strikes and want congressional approval for further action.

---

6. Foreign-policy mission statement (draft)

Draft for companion approval. Do not merge into Record without staging and approval.

U.S. foreign policy must respect the Constitution: Congress declares war and authorizes the use of military force; the executive does not commit American lives or treasure to sustained conflict without that debate and vote. Unilateral military action abroad—especially open-ended intervention in the Middle East—has repeatedly failed to make America safer, has radicalized new generations of adversaries, and has burdened the country with trillions in debt. Transparency and accountability at home—including the release of documents the public has a right to see—matter more than distraction through war. America's role is not to decide who rules other nations; it is to defend the United States, uphold the rule of law, and let the people's representatives decide when and whether we fight.

Sources and dates as of 2026-03-09. Companion-led; stage any new claims for Record via RECURSION-GATE.

WAP internal dashboard (/wap)

Source file: `docs/wap-dashboard.md`

Purpose: Internal web surface for **work-politics** — you and the social media manager track **jobs** (news scan, X drafts, brief hooks) without losing work when a Cursor thread closes. **Not** a client portal in v1; **not** autonomous posting or LLM-on-server (unless added later).

URL (when deployed): `https://<miniapp-host>/wap`
Auth: `WAP_DASHBOARD_TOKEN` — send as `X-Wap-Token: <token>` or `Authorization: Bearer <token>`, or bookmark `https://<host>/wap?t=<token>`.

Environment

Variable	Required	Description
`WAP_DASHBOARD_TOKEN`	Yes (to use dashboard)	Long random secret. Share only with operator + SMM.

Variable	Required	Description
`WAP_JOBS_PATH`	No	Absolute or repo-relative path to the jobs JSON file. Default: `data/wap_jobs.json` under repo root. On Render, use a **persistent disk** mount path if you need jobs to survive redeploys; otherwise data is ephemeral like session-transcript.

Do not paste API keys, passwords, or campaign secrets into job **context** or **output** fields if the jobs file might be copied or committed. Treat stored text as **operational notes** only.

SMM daily workflow

1. Open `/wap` with token; create a **new job** (client, workflow type, context, optional URLs).
2. In Cursor, run the matching skill (e.g. `.cursor/skills/massie-x-news-search-draft/SKILL.md`) with that context.
3. Paste agent output into the job; set status **output_pasted**.
4. Edit and post from X (@usa_first_ky); set status **shipped** when done.
5. Keep content-queue.md in sync for content state (idea → posted).

API (token required)

Method	Path	Body / query
GET	`/api/wap/jobs`	`?limit=100` — list jobs, newest first
POST	`/api/wap/jobs`	JSON: `client_slug`, `workflow`, `context`, `urls` (optional)
PATCH	`/api/wap/jobs/<id>`	JSON: any of `status`, `output`, `context`, `urls`

Statuses: `new` → `ran_in_cursor` → `output_pasted` → `shipped`.

Phase 2 (not implemented)

- Per-client tokens, read-only history for campaigns, approve-draft audit log.
- Optional server-side LLM calls (keys, cost, compliance).

Related

- consulting-charter.md — human approves public ship.
- miniapp-setup.md — deploy and env vars.
- smm-workspace.md — SMM entry point.

Externals — Day 1 quickstart

Source file: `docs/externals/massie/smm-training/day-1-quickstart.md`

Before you touch the account

1. **Read** content-playbook.md § Identity and § Never-do list (5 minutes).
2. **Confirm** you have secure access to `@usa_first_ky` (password manager, 2FA if available).
3. **Save** this one-line bio mental model: *Unofficial independent analysis for KY-4 — not the campaign, not the office.*

Account settings check

Check	Target
Display name	America First Kentucky (Unofficial)
Bio	States unofficial analysis + KY-4 / Massie + not affiliated with campaign or office
Pinned post (optional)	Short explainer of what the account is (see templates.md)

First-day tasks (2–3 hours total)

Task	Notes
Follow / lists	Follow Rep. Massie's X account; build a list for KY media, KY delegation, key national accounts you will monitor (no need to announce).
Like + quote test	One **quote-post** of a recent Massie post with **one sentence** of context + link to source if applicable. Tone: analytical, not hype.
Bookmark workflow	Decide where you track ideas (sheet or doc): columns **Idea → Draft → Review → Posted**.
Escalation	Know who approves edge cases (legal, principal-adjacent, or sensitive topics). If unknown, **don't post** until clarified.

Voice calibration (first day)

- **Sound like:** a sharp analyst who respects voters and cites reality.
- **Don't sound like:** campaign rage-bait, anonymous troll, or "as Thomas Massie I…"

End of day 1

- [ ] Posted at least one reviewed piece of content (reply, quote, or original).
- [ ] Logged what you posted and approximate time (for weekly review).
- [ ] No rule violations from approval-workflow.md.

Tomorrow

Open week-1-ramp-plan.md and follow Day 2.

Externals — Week 1 ramp

Source file: `docs/externals/massie/smm-training/week-1-ramp-plan.md`

Goal: Establish a safe, repeatable rhythm: monitor → draft → review → publish → log.

Day 1 — Safety + first touch

- Complete day-1-quickstart.md.
- One quote or reply; verify bio and display name.

Day 2 — Monitoring loop

- Morning: 15 minutes — scan Massie's posts, top KY political accounts, one national feed you trust for context.
- Post: **Reply or quote** tying a current event to **documented** position (vote, statement, or hearing behavior) with a source link when possible.
- Log: topic + link to post.

Day 3 — Thread practice

- Draft a **short thread** (3–5 posts) explaining **one** issue (e.g. war powers, spending, Fourth Amendment, etc.). Use templates.md.
- Run through approval-workflow.md checklist before posting.
- Post in off-peak window first if you are new to threads (fewer eyes while you learn formatting).

Day 4 — Opposition / correction discipline

- Practice **correction format**: misquote → quote correct → source. No personal attacks.
- If nothing to correct, do a "context" post: what a headline leaves out + link.

Day 5 — Engagement without toxicity

- Reply to **good-faith** questions where you can add value with sources.
- Ignore or mute bad-faith pile-ons per team policy; do not feed circular fights.

Day 6 — Repurpose + consistency

- Turn one strong post from Mon–Fri into a **quote graphic** or **text screenshot** (if your workflow uses visuals) OR a short recap thread "this week in one theme."

Day 7 — Review + scorecard

- Fill a first pass of kpi-scorecard.md (even if estimates).
- 30-minute retro: what worked, what felt risky, what to ask the operator next week.

Week 1 success criteria

- [ ] No posts that imply official capacity or speak as Massie.
- [ ] Every substantive claim has a path to a source (link or cite).
- [ ] You have a repeatable daily slot (see daily-operating-rhythm.md).

Externals — Daily operating rhythm

Source file: `docs/externals/massie/smm-training/daily-operating-rhythm.md`

Recommended time blocks (adjust to your timezone)

Time	Action
Morning (15–20 min)	Scan: Massie posts overnight; KY headlines; one national story if relevant to KY-4 or the principal's known issues.
Midday (10 min)	Queue: move one idea from "idea" to "draft" OR reply to one high-signal thread.
Evening (15–20 min)	Publish: post approved content; log in tracker; note engagement worth following up tomorrow.

Minimum viable day: 1 substantive interaction (reply, quote, or original) + monitoring.

Weekly rhythm

Day	Focus
Monday	Set theme for the week (optional): one pillar from mission (war powers / corruption / cartel economy + border-liberty).
Wednesday	Mid-week thread or long-form post if you have bandwidth.
Friday	Week recap or "best of" quote; update KPI sheet.

Coordination with drafters

If someone else drafts copy:

1. They deliver **text + links** in your agreed channel (email, doc, chat).
2. You **edit for voice** and **platform fit** (length, thread breaks).
3. You **publish** under your account responsibility.

Incident handling

- **Wrong screenshot / bad link:** Delete if misleading; repost corrected with brief note if needed.
- **Viral negative attention:** Pause new posts; escalate to operator; do not argue in circles for hours.

"Good morning" habit (if your team uses it)

Some teams start the day with a **brief + draft candidates** from research. Your job: **curate** — not everything becomes a post. Pick 1–2 items that fit the mission and are sourceable.

Externals — Approval workflow

Source file: `docs/externals/massie/smm-training/approval-workflow.md`

Roles

Role	Responsibility
SMM (you)	Final editorial review, platform formatting, publish, delete/correct if needed.
Drafter / analyst (if any)	Provides sources, draft text, suggested thread order.
Operator / lead	Escalations: legal, ethics, or high-risk topics.

Standard path

1. **Idea** — Fits mission? Sourceable? Timely without being reckless?
2. **Draft** — Full text + URLs + note if image/video is needed.
3. **Review** — Run checklist below (self-review or peer if available).
4. **Publish** — Post during agreed window; log URL and time.
5. **Archive** — Save link in weekly log for KPI review.

Pre-publish checklist (every post)

- [ ] **Disclosure:** Reader can tell this is **unofficial** analysis (bio, pinned, or first tweet in thread).
- [ ] **Source:** Factual claims have a link or cite a public record (vote, press release, hearing).
- [ ] **Voice:** No "I am Thomas Massie" / "we the campaign" language.
- [ ] **Risk:** No doxxing, no private medical/financial accusations, no incitement.
- [ ] **Screenshots:** If using a screenshot of a vote or article, verify date and chamber.

Escalate before posting

- Legal threats or litigation-adjacent topics.
- Anything that could be read as coordination with a campaign or office if untrue.
- Breaking news where facts are still moving — prefer **wait** or **"reports say"** with multiple outlets.

Corrections

- **Minor typo:** Silent fix or delete-repost if engagement is near zero.
- **Material error:** Delete or reply with correction; pin correction if severity warrants (operator call).

If you receive DMs asking for "official" help

- Reply politely: "This account is unofficial analysis; not the office. For constituent services, contact the congressional office through official channels." (Adjust wording to your team's standard.)

Externals — KPI scorecard

Source file: `docs/externals/massie/smm-training/kpi-scorecard.md`

Purpose: Measure **health** of the account, not vanity alone. Review weekly; adjust strategy monthly.

Weekly tracker (copy to your sheet)

Metric	Week of	Notes
Posts published		
Replies / quotes to Massie		
Original threads		
Link clicks (if tracked)		
Follower growth		
Quality		

Tier 1 — Must track

KPI	Why it matters
Posts per week	Consistency beats sporadic spikes.
% of posts with source link	Core brand promise: evidence-based.
Replies/quotes to Massie	Inner loop: amplification of the principal's public voice.

Tier 2 — Signal quality

KPI	Why it matters
Thread completion rate	Did people read past post 1? (impressions on post 3+ if visible.)
Save rate / bookmarks (if available)	Indicates reference value.
Quote tweets from credible accounts	Reach beyond raw likes.

Tier 3 — Avoid over-weighting

KPI	Caution
Raw likes	Easy to game; emotionally noisy.
Total impressions	Can reward outrage; pair with source quality.

Red flags (investigate)

- Sudden follower spikes from low-quality accounts.
- Repeated engagement from coordinated harassment.
- Posts that get traction **without** sources — tighten standards.

Monthly review questions

1. Did we improve **source density** vs last month?
2. Did we amplify Massie's **public record** at least weekly?
3. Did any post require **correction**? What process failed?
4. What **one format** to double down on next month?

Externals — Content playbook

Source file: `docs/externals/massie/smm-training/content-playbook.md`

Identity (always)

- **Who we are:** America First Kentucky — **unofficial** independent analysis and message support focused on KY-4 and Rep. Thomas Massie's **public record**.
- **Who we are not:** The official campaign, the congressional office, or the congressman speaking in his own voice.

Display pattern: Keep "Unofficial" visible in display name or pinned context where the platform allows.

Strategic goals (in order)

1. **Amplify** Massie's public statements and votes with context and sources.
2. **Educate** on constitutional and policy mechanics (war powers, process, committees).
3. **Demonstrate** message discipline and research quality — this account is also a **proof-of-workflow** for other campaigns.
4. **Engage** constructively; avoid becoming a pure outrage account.

Content pillars (rotate)

Pillar	Example posts
War powers / Constitution	Vote explainers, "what Congress should do," separation of powers.
Anti-corruption	Insider trading, transparency, process integrity.
Household economics	Healthcare middlemen, housing supply, inflation drivers — always tie to sourceable policy.
Border + liberty	Enforcement + civil-liberty guardrails in plain language.

Formats that work on X

- **Single tweet:** One claim + one link + optional "why it matters."
- **Thread:** Problem → fact → vote or action → source → takeaway.
- **Quote tweet:** Add context Massie's original post doesn't have room for.
- **Correction:** Wrong claim → right fact → link (no pile-on).

Tone

- **Do:** Clear, calm, evidence-led, respectful of readers' time.
- **Don't:** Personal insults, dehumanizing language, or speaking as "we the campaign."

Never-do list

- Imply endorsement, coordination, or "official" status from Massie or his office.
- Promise outcomes ("he will vote X") unless citing a public commitment.
- Post unsourced claims about opponents, donors, or private facts.
- Let any automated tool post **without** human review on this account.

Hashtags and handles

- Use **@usa_first_ky** in your own materials; **@RepThomasMassie** when amplifying him (verify current handle).
- Hashtags: optional; prefer **clear language** over hashtag spam.

Seasonal / calendar

- Primary and election dates: increase frequency slightly; **never** misstate filing or election rules — link to official sources when in doubt.

Externals — Templates

Source file: `docs/externals/massie/smm-training/templates.md`

Replace bracketed text. **Always** review against approval-workflow.md.

Pinned post (optional)

```
America First Kentucky (@usa_first_ky) is unofficial independent analysis & message support for KY-4, foc

Not the official campaign. Not the congressional office. Not the congressman speaking here.

Sources: [link to votes, Congress.gov, or official statements when possible]
```

Single tweet — vote explainer

```
Context on [vote topic]:

Massie voted [Yea/Nay] on [short bill name]. [One sentence why it matters to KY-4 or the Constitution.]

Source: [link]
```

Unofficial analysis. Sources in each thread.
```

High-stakes messaging — guardrail stress-test

Source file: `docs/skill-work/work-politics/america-first-ky/guardrail-stress-test.md`

Purpose

Reduce predictable failure modes when drafting **high-stakes** america-first-ky outputs (war powers, insider-trading / ethics, cartel-economy claims, border + civil liberties). Methodology is **inspired by** independent evaluation of clinical AI systems — factorial vignettes, reasoning-vs-action mismatch, anchoring, and miscalibrated alerts — not a claim of medical or clinical use.

Inspired-by (verify externally): Icahn School of Medicine at Mount Sinai et al., *ChatGPT Health* structured triage evaluation, **Nature Medicine** (2026). Example institutional summary: Mount Sinai newsroom (https://www.mountsinai.org/about/newsroom/2026/research-identifies-blind-spots-in-ai-medical-triage). Paper: Nature Medicine article (https://www.nature.com/articles/s41591-026-04297-7).

This repo **does not** implement clinical triage. We **borrow** the *epistemic* lessons: tail-risk silence, reasoning that does not match the final recommendation, social anchoring, and alerts that track tone instead of risk.

Scope

In scope	Out of scope
work-politics briefs, X draft packages, opposition memos labeled high-stakes	Automated merge into SELF / EVIDENCE
Operator- and SMM-enforced checklists	`governance_checker.py` enforcement
WORK logs, brief appendices, `content-queue` notes	Routine full traces appended to `self-evidence.md`
Optional pipeline events (`stress_test_proposed`, etc.) via `emit_pipeline_event.py`	Fabricated Python hooks in `governance_checker.py`

Four failure modes (mandatory human checks)

1. **Inverted U / tail risk** — Strong on routine framing; **silent or weak** on rare but consequential scenarios (e.g. sudden energy-market shock + war powers vote).
2. **Model "knows" but output diverges** — Internal reasoning (or scratch notes) flags a constitutional or ethics issue, but the **published** recommendation softens or contradicts it.
3. **Social context hijacks judgment** — Anchoring from "donor says it's fine," poll toplines, or authority cues shifts the conclusion without new evidence.
4. **Guardrails on vibes** — Red-team or internal "blocks" trigger on emotional tone instead of **material** constitutional or corruption risk.

Factorial stress testing (operator method)

For **each** high-stakes base scenario, the operator (or agent under operator sign-off) documents **controlled variations** on the same factual spine. Mount Sinai-style designs used **multiple factorial conditions** on the same vignettes; we mirror that **logically**, not as a medical test.

Typical variation knobs (pick those that apply):

-
  - Social pressure ("donor / colleague says it's fine")
-
  - Contradictory or noisy poll framing
-
  - Time pressure ("vote in 48 hours")
-
  - Tail-risk injection (e.g. sudden chokepoint / price shock relevant to the scenario)

Minimum: 4 variations for a high-stakes brief; **stretch:** 8–16 documented rows in an appendix table.

Pass criterion: For each variation, the **stated recommendation** must be **consistent** with the **same risk notes** (no silent downgrade). Any mismatch → **do not ship**; escalate to operator approval inbox; optionally emit `stress_test_failed` (see below).

Four layers (process — not code)

These are **discipline layers** for humans and drafting agents. They are **not** wired into `governance_checker.py`.

Layer	Meaning
1. Progressive autonomy	On tail scenarios, default to **shadow / draft-only** until operator explicitly approves ship.
2. Deterministic validation	Operator checklist: "Does the final paragraph contradict any explicit risk bullet above?"
3. False-positive flywheel	Prefer **over-flagging** tail risk in internal drafts; then **prune** with evidence before publish.
4. Factorial pass	Run the variation table before finalizing any Massie pilot **high-stakes** brief.

Logging

- **Primary:** WORK artifact — stress-test appendix on the same brief file or linked `stress-test-brief-YYYY-MM-DD.md` under this folder or `work-politics/` weekly brief directory.
- **Do not** routinely dump full reasoning traces into `self-evidence.md`. Optional **ACT-** line only if companion approves a gated candidate that records "we ran stress-test protocol for brief X."

Reasoning–output alignment

- **No automated "alignment score"** in this repo unless separately specified and stored in WORK.
- Human rule: if scratch reasoning contains "constitutional concern" / "insider risk" / "unsourced claim," the **shipped** text must **acknowledge** the same tier of concern or **remove** the risky claim.

Suggested pipeline events (optional)

`scripts/emit_pipeline_event.py` accepts arbitrary `event_type` strings. Suggested names for audit (operator-run):

- `stress_test_proposed` — candidate id `none` or brief slug in extras
- `stress_test_passed` / `stress_test_failed`
- `guardrail_mismatch_detected`

Example (adjust user id if needed):

```
python scripts/emit_pipeline_event.py stress_test_passed none brief=weekly-2026-03-20 territory=wap
```

When to run

Always before final human sign-off on:

- War powers / use-of-force briefs
- Congressional ethics / stock-trading messaging
- "Cartel economy" claims that imply specific actors or legal conclusions
- Border + civil-liberty combined messaging in volatile news windows

Optional for low-stakes engagement posts.

High-stakes messaging — stress-test brief template

Source file: `docs/skill-work/work-politics/america-first-ky/stress-test-brief-template.md`

Base scenario: [Original question or brief thesis — one paragraph]

High-stakes tags: [ ] war powers [ ] insider / ethics [ ] cartel economy [ ] border + civil liberties [ ] other: ___

Factorial variations (same factual spine)

#	Variation	Risk notes (drafting scratch)	Final recommendation one-liner	Aligned? (Y/N)
1	Baseline (no pressure)			
2	+ Social anchoring ("donor / colleague says it's fine")			
3	+ Tail risk (e.g. sudden energy/chokepoint shock)			
4	+ Time pressure ("vote in 48h" / "post tonight")			
5	+ Contradictory poll framing			
6	(add as needed)			

Four failure-mode checks

Mode	Evidence this brief passes	Operator initials
Inverted U / tail	Tail row explicitly addressed; no hand-waving	
Reasoning vs output	No bullet above contradicts shipped recommendation	
Anchoring	Social-pressure rows did not change tier of risk without new facts	
Vibe guardrails	No "blocked" or softened conclusion solely for tone	

Summary

- **Reasoning–output alignment:** PASS / FAIL (if FAIL → do not ship; escalate)
- **Operator sign-off:** [name] [date]

Final guarded output (only after PASS)

[Paste or link the brief / thread draft approved for Xavier or external use]
